# FRESH AIR IN INSULATED ROOMS

## Kömmerling 76 centre seal ClimaTec

The better your living spaces are insulated, the more important ventilation becomes. The right balance is crucial – not too much, to prevent heat loss, but also not too little, so that there is no moist indoor climate in which mould could form.

With Kömmerling 76 centre seal ClimaTec, it's child's play to find the optimum balance – because this automatic window rebate ventilator works as if by itself. This ensures a healthy, controlled supply of fresh air at all times, with optimum energy efficiency.

### AUTOMATIC

- Self-regulating, easy-to-clean window rebate ventilator
- Provides controlled supply of fresh air without manual ventilation
- Does not require a power source

### TESTED

- Complies with the German Energy Savings Act
- Tested sound insulation up to 43 dB (SSK4)
- Tightness against driving rain and passage of air as per DIN and EU standards
- Ventilation as per DIN 1946-6 and DIN 18017-3

### SUSTAINABLE

- Minimises high air humidity and the risk of mould
- Protection of the building fabric
- Prevents heat loss and saves heating energy

### USER-FRIENDLY

- Almost invisible from indoors and outdoors: Lies concealed in the outer frame rebate
- Automatic wind pressure regulation of the window
- Protects against insects thanks to integrated ventilation grille
