

THE RENOVATION SET FOR JAMBS
KömaFrame

FAST. SIMPLE. CLEAN.

KömaFrame – the renovation set for jambs

A lot of dirt and effort is involved when old windows are to be replaced with new ones – a challenge that is frequently encountered during renovation and restoration work. Painters and plasterers often have to be called in as well. But it is possible to make this process quicker and cheaper: With the KömaFrame kit system from Kömmerling. Using this set, jambs can be clad easily and quickly, without the need for additional trades.

KömaFrame consists of KömaCel, a pioneering development by Kömmerling. These special integral PVC skinfoam sheets impress with their perfectly coordinated combination of outer coat and core. This makes the system a true allrounder with impressive properties: KömaCel is extremely resistant to moisture and offers low thermal conductivity, so therefore has a good thermal insulation and sound insulation factor. It is also easy to work with.

All this makes KömaFrame the ideal solution for window renovations and restorations.

USER-FRIENDLY

- › Simple manufacture
- › For quick and easy replacement of soffit profiles
- › No additional trades necessary
- › Clean installation
- › Easy to clean

HIGH-QUALITY

- › Very good bonding
- › Ideal for lamination and painting
- › Very good flexural strength
- › Chemical- and corrosion-resistant
- › Low water absorption: No swelling

SUSTAINABLE

- › Good sound insulation
- › Good thermal insulation
- › Excellent chemical resistance
- › 100% recyclable

OPTIONAL

- › Flame-resistant version
- › Antibacterial alternative
